

Kotka-Hamina Region technology companies and Cursor join forces at the Subcontracting Trade Fair 2016 in stand C549

The joint stand **C549** in Hall C strongly promotes the region's great competence in the metal industry and industrial services, maps the new growth and development opportunities in the field and provides information about the Kotka-Hamina Region.

The joint participation is also a part of the International Business in Kymenlaakso Project (IBiK), which is aimed at promoting the access of Kymenlaakso-based companies to the international market and to networks that operate in the areas that are the best fit for the competence of the company or network of companies, or in brand new business areas. Project objective/Purpose: Developing the international competence of companies while taking sustainable development and environmental requirements into account; increasing turnover and productivity, access to new markets, creating new products and services as well as the associated R&D and applied research.

The 3D Navetta Printing Innovation Centre is a cluster of innovation in 3D manufacture that serves the additive manufacturing needs of the Kotka-Hamina Region and all of Finland. 3D Navetta provides its customers and partners with manufacturing services in relevant materials, including metal, plastic and gypsum. Training, expert and consulting services are an integral part of what 3D Navetta offers. We work in close co-operation with Aalto University, Kymenlaakso University of Applied Sciences and Lappeenranta University of Technology, thus combining their expertise in additive manufacturing with the strong industrial competence already existing in the region. This enables us to create better solution models for selected products and support product development, for example.

CURSOR OY, the Kotka-Hamina Regional Development Company, provides guidance in matters connected to entrepreneurship and business operations. Cursor develops the regional competence areas and builds new opportunities for success in co-operation with companies. Cursor maintains a register of local companies and the available business premises and industrial lots. Cursor strives to support and strengthen the well-being and business competitiveness of the region.

The trade fair stand will feature Cursor as well as the following companies that specialise in metal industry subcontracting, custom orders and industrial services:

HNR-Konopaja Oy
Jalotakka Oy
Juhani Haavisto Oy
Karhula Foundry Ltd
Kotkan Konopaja Oy
Kotkan Levytyö Oy
Suptek Oy
Työkaluhiomo H. Sunila Ky

Read more about them on the next page:

HNR-KONEPAJA OY is a custom and subcontracting engineering workshop established in 1983. The company's primary products include medium welded steel structures, plate work, machining and their combinations using modern CNC machines, equipment installations and industrial maintenance.
